Micro-Credential Supplement

- Countries of the issuer: Germany, Italy, Portugal, Slovenia, Spain
- Awarding body: The In4Sustain Partnership
- Notional workload needed to achieve the learning outcomes: 0.5 ECTS
- Level: 4, 5 and 6 according to the European Qualifications Framework (EQF)
- Type of assessment: Test
- Language of instruction: English
- Form of participation in the learning activity: Online
- Type of quality assurance used to underpin the micro-credential: Evaluation Committee of the In4Sustain Partnership
- Learning outcomes:

Knowledge: Factual and theoretical knowledge of sustainability in the T&C sector across seven areas: (1) Circular Economy, including life cycle thinking and circular design; (2) Certifications, including their role in transparency and traceability; (3) Sustainable Materials, considering the BioSphere and TechSphere perspectives; (4) Sustainable Business Models, including waste and energy management; (5) Communication & Storytelling for sustainability; (6) Consumer Engagement in circular practices; and (7) CSR & Community Engagement, including the Digital Product Passport and the CSRD.

Skills: Cognitive and practical skills to assess sustainability options for materials, certifications and business processes, and to plan communication and engagement actions tailored to consumers, employees and external stakeholders.

Responsibility and autonomy: Contribute autonomously to planning and promoting sustainability initiatives within their organisation, engaging colleagues and external partners, and reviewing company practices in light of evolving sustainability requirements.
